

UF HRPP Workflow:

How to address human research studies approved at UF when a faculty member who is principal investigator retires, leaves UF, or whose primary appointment transfers to another university/ institution (departing Principal Investigator / DPI)

NOTE: DPI’s should resolve these issues prior to leaving UF. If a DPI does not address this issue prior to leaving UF, their Department Chair must name a PI Proxy to oversee the research and address any administrative requirements such as closing the studies or making necessary revisions.
